Airplane race Creator

If you want you can have a look to the documentation section Camera (page 138).

It explains how to modify the camera.

There is no option to change the Camera Y position for the Back camera.

But you can use this tips:

In your Airplane prefab (00_Vehicle_Base_sc) change the Y position of Grp_CamView_01_DefaultOutside (spot 1).

It should work.

Don't forget to override the prefab after the modification.
